Webhooks

Mit Webhooks können Sie bei vorher definierten Aktionen eine Benachrichtigung (Event) an einen HTTP-Server (z.B. Ihre Webanwendung) verschicken.

Die Benachrichtigungen enthalten jeweils die zur Aktion relevanten Daten im JSON-Format.
Die enthaltenen Datenstrukturen können Sie unserer API-Dokumentation, Abschnitt *Schemas* im unteren Bereich, entnehmen.

Event Types

Schema documentation: **https://api.fakturia.de/documentation/**
Section *Schemas*

Event Type	Beschreibung DE	Description EN	Schema (payload)
Kunde / Customer			
CUSTOMER_CREATED	Kunde angelegt	Customer created	Attribute: customer Type: Customer
CUSTOMER_CHANGED	Kunde geändert	Customer changed	Attribute: customer Type: Customer
CUSTOMER_DELETED	Kunde gelöscht	Customer deleted	Attribute: customer Type: Customer
CUSTOMER_CHANGEREQUEST_CREATED	Änderung der Kundendaten im Kundencenter beantragt	Change of customer data requested in customer center	Attribute: changeCustomer Type: ChangeCustomer
Artikel / Item			
ITEM_CREATED	Artikel angelegt	Item created	Attribute: item Type: Item
ITEM_CHANGED	Artikel geändert	Item changed	Attribute: item Type: Item
ITEM_DELETED	Artikel gelöscht	Item deleted	Attribute: item Type: Item
Vertrag / Contract			
CONTRACT_CREATED	Vertrag angelegt	Contract created	Attribute: contract Type: Contract
CONTRACT_ACTIVATED	Vertrag aktiviert	Contract activated	Attribute: contract Type: Contract
CONTRACT_CHANGED	Vertrag geändert	Contract changed	Attribute: contract Type: Contract
CONTRACT_TERMINATED	Vertrag gekündigt	Contract terminated	Attribute: contract Type: Contract
CONTRACT_ENDED	Vertrag beendet (Vertragsende erreicht)	Contract ended (date of termination reached)	Attribute: contract Type: Contract
Rechnung / Invoice			
INVOICE_CREATED	Rechnung erstellt	Invoice created	Attribute: invoice Type: Invoice
INVOICE_PAYMENT_RECEIVED	Rechnung: Zahlungseingang erhalten	Invoice: payment received	Attribute: invoice Type: Invoice Attribute: payDate Type: date (payment date) Attribute: payAmount Type: number (amount paid)
INVOICECORRECTION_CREATED	Rechnungskorrektur erstellt	Invoice correction created	Attribute: invoicecorrection Type: InvoiceCorrection
Mahnwesen / Dunning			

DUNNING_CREATED	Mahnung verschickt	Dunning sent	Attribute: invoice Type: Invoice Attribute: dunningLevel Type: number (new dunning level)
Bestellung / Order			
ORDER_RECEIVED	Bestellung erhalten	Order received	Attribute: orderCustomer Type: OrderCustomer
ORDER_PROCESSED	Bestellung: Kunde angelegt	Order: Customer created	Attribute: orderCustomer Type: OrderCustomer Attribute: customer Type: Customer (created customer)
ORDER_CANCELLED	Bestellung storniert	Order cancelled	Attribute: orderCustomer Type: OrderCustomer
ORDER_PSP_EVENT	Aktivitäten im Zusammenhang mit dem Bezahlvorgang (nur bei PSP)	Payment events received (PSP only)	Attribute: orderCustomer Type: OrderCustomer
Test			
TESTHOOK	Test-Aufruf	Test call	Attribute: dummyData Type: Dummy

Example JSON

Each Webhook consists of the following fields:

- eventType: event type (see above)
- triggerDate: date at which the event occured
- triggerUser: user, triggering the webhook
- webhookConfig: ID of the webhook configuration this webhook was generated for
- retryCount: number of already occured retries
- payLoad: the data attributes (see above)

Example JSON: CUSTOMER_CREATED

```
{
   "eventType":"CUSTOMER_CREATED",
   "triggerDate":"2019-05-22T10:52:15",
   "retryCount":0,
   "payload":{
      "customer":{
         "salutation":"MR",
         "firstName":"Holger",
         "lastName":"Tester",
         "companyName":null,
         "locale":"de_DE",
         "websiteUri":null,
         "phone1":null,
         "phone2":null,
         "telefax":null,
         "mobile":null,
         "email":"mail@example.net",
         "birthdate":null,
         "euTaxId":null,
         "taxNumber":null,
         "noteText":null,
         "postalAddress":null,
         "billingAddress":{
            "addressLine1":"Teststraße 1",
            "addressLine2":null,
            "addressLine3":null,
            "zipCode":"12345",
            "cityName":"Testhausen",
            "state":null,
            "country":"DE"
         },
         "customerNumber":"K1234",
         "taxRegion":"NATIONAL",
         "duePeriod":0,
         "dueUnit":"DAY",
         "paymentMethod":"BANKTRANSFER",
         "emailInvoice":null
      }
   }
}
```
